Evaluation of [REDACTED]  
[REDACTED]

1. D/M branches have received little or no benefit from the reporting under the subject program. M/NF has indicated that one report on Noril'sk was of some benefit at the time of its receipt but that the information in this report has now been superseded by subsequent reports from other sources.

2. The April 1958 change in format and content of reporting under the program made no noticeable impact on the needs of D/M branches.
